

Tru-Bond™ PSA 30000

Pressure Sensitive Adhesive, UV/Visible Light Cure Adhesive

PRODUCT DESCRIPTION

Tru-Bond™ PSA 30000 is a one-part, solventless PSA (pressure sensitive adhesives) that cures to a tacky adhesive when exposed to UV/Visible light. This adhesive can be cured directly through clear or translucent surfaces or cured first prior to assembly. The curing first method allows for the joining of parts at some future point. This product can bond a wide range of substrates including PE, PP, PET, and most plastics, metals, glass, and ceramics. It can be sprayed, roll coated, bead or brush applied, screen printed or used in a flexographic printing process.

PRODUCT CHARACTERISTICS		Optical Clarity, %	>98
Chemical Class	Acrylic	Water absorption, ASTM D570 (24 hrs.), %	0.4
Appearance(uncured)	Clear liquid	Boiling Water, ASTM D570 (2 hrs.), %	3.4
Components	Single-requires no mixing	Shore hardness	33 A
Viscosity	medium	SAFT(Shear Adhesive Failure Temperature), °F(°C)	260(127)

TYPICAL PROPERTIES OF UNCURED MATERIALS

Specific gravity@23 °C	1.12
Viscosity@23 °C, Brookfiel	ld RV
Spindle 3, 6 rpm, cP	30,000
Flashpoint, °F(°C)	>212(100)
Non-Volatile Materials, %	>99
VOC, %	<1
Shelf life, mos	24
Solubility	ketones, oxygenated solvents

TYPICAL PROPERTIES OF CURED MATERIALS

Color **Optically Clear** Refractive Index, ASTM D542 1.48 ADHESION PERFORMANCE Peel Force to Various Substrates. PSTM1 Test., 3-mil adhesive on PET film, Cured at 1.2 J/cm2 with Fusion

System D bulb. Assembled and then tested at 24 hours. 90° peel test.

	<u>pli</u>	<u>N/mm</u>
PVC	6.05	1.06
Acrylic	6.68	1.17
Polycarbonate	7.37	1.29
Glass	8.51	1.49
ABS	6.23	1.09
Polypropylene	4.17	0.73

UV CURE AND TIMELINE LATITUDE

Fusion Systems 300WPI lamp- "D" (doped) bulb at 4 inches. 3-mil PET to untreated steel

NOTE: All of these test pieces passed >10 days of creep resistance at ambient and 50 °C.

PROCESSING

ITW products are easily applied by syringe dispense or specialty valve spray units. The materials cure extremely fast in bondlines, e.g. where the surfaces are not exposed to air, with UV or Visible radiation. Exposure doses range from .5 - 2 J/cm² depending on the intensity of the lamps and configuration of the assembly.

PRECAUTIONS

Please refer to the appropriate material safety data sheet (MSDS) prior to using this product.

STORAGE

Store the unopened product in a cool, dry, well ventilated location away from sources of heat. Optimal storage temperatures should range between 10 °C (50 °F) and 32 °C (90 °F). Do not expose the product to light. It may polymerize upon prolonged exposure to ambient or artificial light. removed from the containers during use should not be returned to original containers in order to avoid potential contamination.
